Introduction to Business Ventures
This course allows students to explore a variety of industries of interest to them. The structure of the organizations, competitive activity, consumer attitudes as well as the job functions needed to make each successful will be examined. Students will engage in group discussions regarding the importance of the industry to the consumer and the economy. Students will complete this introductory course with a broad knowledge that can be streamlined to a specific industry in courses that follow.

Computer Forensics
The expansion of the Internet and the increased use of computers have amplified the risk of technology being used to commit crimes and/or crimes being recorded on electronic devices. Because of this, a skilled computer forensics expert is needed to investigate criminal and civil cases. This course is an introduction to computer forensics. Digital media, past and current operating systems, and computer hardware will be examined. Forensics software tools will be used to identify, collect, examine and preserve evidence/information which is magnetically stored or encoded on computer devices.

Healthcare Law & Ethics
This course will introduce for discussion a variety of ethical issues that healthcare professionals may encounter during the course of their careers. Emphasis will be placed on the importance of ethical and professional behavior in the healthcare workplace. In depth discussions, textbook assignments and role playing will provide guidance to students in how to successfully manage patient relationships, protect patient privacy in compliance with the Health Insurance Privacy and Accountability Act as well as understand the distinct job responsibilities of the myriad of employees who comprise the typical healthcare organization. Students must receive a minimum grade of a “C” (70%) to continue. Students may receive a grade of D (60-69%) but will be required to repeat the course.

Financial Accounting I
Students taking Financial Accounting I will be involved in accounting theory and its applications. In addition, there will be an in-depth study of the nature of assets and liabilities such as cash, accounts receivable, accounts payable, short-term investments, inventories, plant and equipment, intangibles and the preparation of financial statements. During the semester, emphasis will be placed on journal entries, posting, preparation of month-end financial statements as well as closing and adjusting entries.

Digital Design & Graphics
This course combines concepts and practical skills in the field of digital imaging. Building skills and understanding in the execution of typography, color theory, aesthetics, design thinking, and creative problem solving best practices. Students will explore digital image formats, creation, storage, manipulation, color layout and the elements of design required for web pages, interface design, and printed media. Students will plan, execute and layout professional level projects using a full range of digital technology.

Psychology
This course takes a realistic approach based on the principles of general psychology and is designed to assist the student in coping with life situations. Included are theories of personality, emotions, character, motivation, environmental influences, and the development of students.
